PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write few sentences regarding the importance this manuscript for scientific community. Why do you like (or dislike) this manuscript? Minimum 3-4 sentences may be required for this part.	Informative manuscript describing the ground conditions but in this study sample size from one village was taken very less, for any categorization study sample size should be enough. In this study number of villages can be reduced and number of farmers in one village should be increased. In this study along with these parameters socio economic parameters can also be taken and this study should be correlated with socioeconomic level of farmers and livelihood of farmers.	
Is the title of the article suitable? (If not please suggest an alternative title)	It is not assessment, it is classification only on the basis of data.	
Is the abstract of the article comprehensive? Do you suggest addition (or deletion) of some points in this section? Please write your suggestions here.	Abstract is too elaborated and it should be concised.	
Are subsections and structure of the manuscript appropriate?	Subsections ok. I have mentioned by crossing some sentences and some word which are not required and I mentioned some sentences and words in red letters which are required as per my view.	
Please write few sentences regarding the scientific correctness of this manuscript. Why do think that this manuscript is scientifically robust and technically sound? Minimum 3-4 sentences may be required for this part.	This is a ground study and this study is very useful for making some programs for the improvement of conditions of farmers staying there. This study is technically good but sample size per village is small.	
Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.	Okay	
Minor REVISION comments		
Is language/English quality of the article suitable for scholarly communications?	Ok. Some mistakes were there which were mentioned.	
Optional/General comments		
	Overall good theme, technically good, ground study but sample size per village small.
