

Review Form 3

Journal Name:	International Journal of Environment and Climate Change
Manuscript Number:	Ms_IJECC_121118
Title of the Manuscript:	Identification of Groundwater Prospect Zones in Wakawali Watershed of Ratnagiri District of Maharashtra, India Using Geospatial and AHP Technology
Type of the Article	Original Research Article

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.		
Is the title of the article suitable? (If not please suggest an alternative title)		
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.		
Are subsections and structure of the manuscript appropriate?		
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.		
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.		

Review Form 3

<p>Minor REVISION comments</p> <p>Is the language/English quality of the article suitable for scholarly communications?</p>		
<p>Optional/General comments</p>	<ol style="list-style-type: none"> 1. Enhance the introduction and incorporate relevant literature review to provide a comprehensive overview of the study's context and significance. 2. Describe the climatic characteristics of the study area. 3. Provide the reasons for selecting the studied satellite and explain the details of the images obtained from this satellite. Additionally, describe the necessary corrections that need to be applied. 4. In the introduction, the application and significance of zoning and studying underground water from various perspectives are discussed. However, this topic is not addressed in the remainder of the article. Therefore, it is important to incorporate a discussion of these aspects into the conclusion section. 	

PART 2:

	<p>Reviewer's comment</p>	<p>Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</p>
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes. Kindly please write down the ethical issues here in details)</i></p>
