

Editor's Comment:

I have carefully gone through the revised version and original version of the manuscript and found that the author has attended to most of the suggestions made by reviewers. However, the format of the manuscript needs to be revised further. Should not write anything in bullet form. At the end of the abstract the author has given objectives in bullet form. It should not happen.

Ask the author to follow the journal guidelines and revise the manuscript accordingly in the correct format.
