

Editor's Comment:

The authors considered my suggestions and made the following changes:

- they changed the title
- they added a LR section. In this case, the authors only they added the title of this section. I suggest to entitled the section Literature review and hypotheses development because this is what the authors did. Also, there is need to add phrases to make connections between the ideas, otherwise is too sketchy.
- Subsection 4.9 is too divided and I suggest to remove the titles of 4.9.1 to 4.9.5
- Also, the authors added a paragraph to the Conclusion section related to COVID-19 pandemic. In this section I recommend to eliminate the word "suggestion" and let the ideas to follow normally.
