<b>EDITORIAL COMMENT'S on revised paper (if any)</b>	<b>Authors' response to editor's comments</b>
<ol style="list-style-type: none"><li>1. I suggest to entitled the section Literature review and hypotheses development because this is what the authors did.</li><li>2. There is need to add phrases to make connections between the ideas, otherwise is too sketchy.</li><li>3. Subsection 4.9 is too divided and I suggest to remove the titles of 4.9.1 to 4.9.5</li><li>4. Also, the authors added a paragraph to the Conclusion section related to COVID-19 pandemic. In this section I recommend to eliminate the word "suggestion" and let the ideas to follow normally.</li></ol>	<ol style="list-style-type: none"><li>1.
