

**Editor's Comment:**

I am glad to evaluate this interesting piece of research paper and found that the authors have done good jobs in revising their manuscript based on the scholastic comments/suggestions raised by the reviewers as well as improving the manuscript in a good manner. However, there are still many ways that the words and languages can be improved (especially, by a native English speaker) as well as formatting/arranging of tables, citations and references, which need to be corrected/revised based on the prescribed guidelines of the journal before final printing. Therefore, I recommend this paper for publication in "Annual Research & Review in Biology" with the revisions as suggested above.
