

Review Form 3

Journal Name:	Asian Journal of Soil Science and Plant Nutrition
Manuscript Number:	Ms_AJSSPN_120284
Title of the Manuscript:	Effect of Different Organic and Inorganic Fertilizers On Growth Parametes of Soybean (Glycine max L. Merr.)
Type of the Article	Original Research Article

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write few sentences regarding the importance this manuscript for scientific community. Why do you like (or dislike) this manuscript? Minimum 3-4 sentences may be required for this part.	Although the topic "Integrated Nutrient Management" is very important, the authors didn't achieve it. INM not means combination of organic and inorganic sources at any rates but the combination should be added at the recommended rates needed for achieving the optimum yield of soybean under given conditions. From the environmental view point, the use of minimum doses of chemical fertilizer supplemented with rates of organic forms is very useful to survive environment and soil health.	
Is the title of the article suitable? (If not please suggest an alternative title)	Due to "INM" the Title could be changed to " Integrated Nutrient Management for Optimum Growth Traits and Yield of Soybean Crop"	
Is the abstract of the article comprehensive? Do you suggest addition (or deletion) of some points in this section? Please write your suggestions here.	Abstract should be reconstructed including some details about the experimental site (Be descriptive). More details about Results See comments on MS	
Are subsections and structure of the manuscript appropriate?	Not appropriate	
Please write few sentences regarding the scientific correctness of this manuscript. Why do think that this manuscript is scientifically robust and technically sound? Minimum 3-4 sentences may be required for this part.	It will be sound and applicable if the authors followed the scientific roles of writing in scientific research. There is no M&M section. This section should include details about the experimental soil and organic & inorganic sources and its full analyses (Chemical, Physical and macro and microelements content). This section is absent. Therefore, I cannot judge the obtained results without full M&M knowledge. This is the backbone of the work.	
Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.	No	
Minor REVISION comments Is language/English quality of the article suitable for scholarly communications?	No	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
