Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Is the manuscript important for scientific community? (Please write few sentences regarding this manuscript to justify your answer)</p>		
<p>Is the title of the article suitable? (If not please suggest an alternative title)</p>	<p>The manuscript entitled "Effect of organic manures and biocapsules on growth, yield and quality of strawberry (<i>Fragaria x annanasa</i>-Winter dawn)". The paper is adequately original, but the presentation of the manuscript is some poor, with minor errors that must be corrected. My suggestions are as follows:</p> <ol style="list-style-type: none"> 1. In the Statistical analysis section provide statistical software name used for statistical analysis. 2. Add all abbreviations used in the manuscript after keywords. 3. Correct the botanical name in title such as <i>Fragaria X annanasa</i> cv. Winter dawn 4. Scientific name must be in italic. Check it. 5. The introduction is long and poor. Only two references are given in introduction part kindly mention more references in this part. 6. Give the source of data of climactic condition. 7. The discussion part is needed to improve. 8. Add more recent references related to studied crop. 9. Evaluate the clarity and conciseness of the conclusion. The conclusion is cursory and does not effectively summarize the key findings or their implications. Consider explicitly stating the contributions and providing recommendations for future research or practical applications of your study. 10. Cross check the references. <p>Finally, After correction I am hereby recommending for a research article entitled "Effect of organic manures and biocapsules on growth, yield and quality of strawberry (<i>Fragaria x annanasa</i>-Winter dawn)." has to be published after some more adding scientific information in your esteemed journal.</p>
