

Review Form 3

Journal Name:	Archives of Current Research International
Manuscript Number:	Ms_ACRI_120452
Title of the Manuscript:	On some aspects of Multi-Dimensional Scaling: Insights and Applications
Type of the Article	

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write few sentences regarding the importance this manuscript for scientific community. Why do you like (or dislike) this manuscript? Minimum 3-4 sentences may be required for this part.	The research gives a brief idea about multi-dimensional applications. How to represent data in two or three dimensions that is easy for the user to understand. it useful for its application to display intermediate data. It does not provide any possibility to display huge data	
Is the title of the article suitable? (If not please suggest an alternative title)	The title is suitable	
Is the abstract of the article comprehensive? Do you suggest addition (or deletion) of some points in this section? Please write your suggestions here.	The reference (Saeed et al., 2018) must be removed from the abstract. The abstract does not contain any reference, it is only a summary of the current work. It is better to remove the sentence. The reference (de Leeuw and Mair, 2009) must be removed from the abstract. The abstract does not contain any reference, it is only a summary of the current work. The abstract must be rewritten. The conditions for writing the abstract must be observed.	
Are subsections and structure of the manuscript appropriate?	The subsections and structure of the manuscript are appropriate	
Please write few sentences regarding the scientific correctness of this manuscript. Why do think that this manuscript is scientifically robust and technically sound? Minimum 3-4 sentences may be required for this part.	The following must be modified 1. Multidimensional Scaling (MDS): the section is clear but must be summarized. 2. Definitions and examples: To obtain more accurate measurements for similarity or dissimilarity, a correlation coefficient and correlation pairwise metric must be added. 3. Example 2. An Application of MDS to Morse Code Confusions Data: The Morse code must be explained before figure iv .	
Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. :	the references are good and suggest the reference of visualization such as a. Information visualization by dimensionality reduction: a review b. "Data Visualization Principles and Practice c. Dimensionality Reduction for Data Visualization	

Review Form 3

Minor REVISION comments Is language/English quality of the article suitable for scholarly communications?	The language quality of the article is suitable for scholarly communications	
Optional/General comments	the following must be add in the article 1. Add a paragraph about the visualization data. 2. Add another examples	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
