

**Review Form 3**

Journal Name:	<b>Archives of Current Research International</b>
Manuscript Number:	<b>Ms_ACRI_121124</b>
Title of the Manuscript:	<b>Leaf area influences photosynthetic activities, raisin yield and quality in Manjari Kishmish grape variety</b>
Type of the Article	

### Review Form 3

#### PART 1: Review Comments

<b>Compulsory</b> REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	Leaf removal is an operation that significantly affects the quantity and quality of grape harvest. By choosing the optimal leaf area, it is possible to regulate the ripening time of berries and their chemical composition to a certain extent, avoid excessive use of herbicides, and mitigate the effects of climate change. From this point of view, this manuscript is of undoubted importance to the scientific community.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	It's normal	
Are subsections and structure of the manuscript appropriate?	Yes	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The Introduction section is too short, it would be appropriate to add some recent references, preferably foreign ones. Also, some references should be added to the Discussion section. In Materials and Methods section the brief soil-climatic conditions of the research venue should be given. According to Fig.1, the length and width of berries, for example, in T2 variant, exceed those in the T3, while according to the Table 2, the 50-berry weight is higher in the T3 variant; It should be explained (or corrected).	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Actually yes, but great part of them are of the Indian author; the topic is actively studied throughout the world, and I would suggest add some recent foreign references.	
<b>Minor</b> REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	Yes	
<b>Optional/General</b> comments	Much work has been done, appropriate methods have been used and valuable results have been obtained. After minor corrections, the article can be published.	

#### PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
