Journal Name:	Asian Journal of Cardiology Research
Manuscript Number:	Ms_AJCR_120858
Title of the Manuscript:	Study in Efficacy of Ayurvedic Panchakarma Therapy with Lifestyle Modification in Management of Patients with Inducible Ischemia
Type of the Article	Original Research Article

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The manuscript is very relevant to include the other modalities of treatment of ischemia besides the lifestyle modification. It shows significant difference in the parameters after adding the Pachkarma to the treatment of Ischemia. The ancient modes of treatment can be used as an add on for treating many patients besides medications and it would indeed be beneficial to the patient include them in the lifestyle modifications.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes it is comprehensive	
Are subsections and structure of the manuscript appropriate?	yes	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The study evaluates and document the effect of Ayurveda-based dietary modification and Panchakarma therapies with the help of modern diagnostic tools and techniques. We believe that this study will pave the way for further studies using novel and promising diagnostic findings to validate traditional medicine. These procedures are commonly used in conjunction with allied therapies in order to cleanse the channels, eliminate toxins from the body, and restore balance	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	yes	
Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	yes	
Optional/General comments	Ayurveda-based dietary modification and Panchakarma therapies may led to plaque regression and stabilization by causing a significant reduction in serum lipid parameters, TAV, and soft plaque component without a substantial reduction in the calcified plaque components of the atheroma.
