Please write few sentences regarding the scientific correctness of this manuscript. Why do think that this manuscript is scientifically robust and technically sound? Minimum 3-4 sentences may be required for this part.	The manuscript is scientifically robust and technically sound as it utilizes a mixed-method approach, combining qualitative and quantitative data to analyze the spatial implications of digital technologies. The study is well-researched and provides a critical assessment of existing literature, ensuring a comprehensive understanding of the topic. The use of secondary data from reliable sources further strengthens the validity of the findings	
Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.	The references are sufficient and include recent publications relevant to the study. No additional references are needed at this time.	
Minor REVISION comments Is language/English quality of the article suitable for scholarly communications?	Yes, the language and English quality of the article are suitable for scholarly communication.	
Optional/General comments	This manuscript provides significant insights into the evolving dynamics of digital geographies and their impact on urban and rural spatial interactions. It addresses the ontological and epistemological dimensions of digital technologies and their role in shaping new urban realities, which is crucial for understanding contemporary urbanization processes. The study also highlights the uneven distribution of digital infrastructure and its socio-economic implications, making it a valuable contribution to geographical and urban studies.
