

Review Form 3

Journal Name:	International Journal of Medical and Pharmaceutical Case Reports
Manuscript Number:	Ms_IJMPCR_121203
Title of the Manuscript:	Eruptive xanthoma and hypertriglyceridemia in type 2 diabetes mellitus with poor metabolic control
Type of the Article	Case report

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This is a good case report. We should focus on eruptive xanthoma on extensor aspects of extremities during routine screening of diabetic patients. It help us for early rcognition of hypertriglyceridemia, poorly controlled diabetes, pancreatitis and cardiovascular disease so we can implement the preventive strategy.	
Is the title of the article suitable? (If not please suggest an alternative title)	It is better to use below title: Eruptive xanthoma as alarming sign of hypertriglyceridemia in poorly controlled type 2 diabetes mellitus	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Abstract is enough for case report	
Are subsections and structure of the manuscript appropriate?	Subsection and structure of the manuscript placed appropriately	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	This manuscript is technically sound and helpful in medical science for early diagnosis of uncontrolled diabetes mellitus and its related complications. Please specify that eruptive xanthoma is a complication of Type 2 Diabetes mellitus or isolated hypertriglyceridemia can also produces the xanthoma. 1 st line of case report you mentioned Type 1 Diabetes. Patient initially managed with OHA then how could possible to say Type 1 Diabetes 4 th line of case report: Please mention full form of AEG 2 nd page 1 st line: How it is possible that height and weight is only 5 th percentile Image cite as Figure 1 instead of photo	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	References are sufficient	
<u>Minor</u> REVISION comments Is the language/English quality of the article suitable for scholarly communications?	Have few grammar related correction. Please correct accordingly	
<u>Optional/General</u> comments
