

Review Form 3

Journal Name:	Journal of Complementary and Alternative Medical Research
Manuscript Number:	Ms_JOCAMR_121668
Title of the Manuscript:	Hippocratea africana root extract and fractions attenuated carbon tetrachloride-induced oxidative stress and liver injuries in rats
Type of the Article	Research article

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This research highlights the potential of Hippocratea africana root extract in mitigating oxidative stress and liver damage caused by toxins.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Restructure the abstract according to methodologies and major findings	
Are subsections and structure of the manuscript appropriate?	Yes	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The manuscript demonstrating that Hippocratea africana root extract and its fractions attenuate carbon tetrachloride-induced oxidative stress and liver injuries in rats appears scientifically robust and technically sound for several reasons. The study employs a well-established animal model to investigate hepatoprotective effects, utilizing appropriate controls and experimental groups to ensure the validity of the findings. The biochemical assays used to measure oxidative stress markers and liver function are standard and reliable, providing solid evidence for the observed protective effects. Additionally, the thorough statistical analysis and clear presentation of the data further support the credibility and reproducibility of the results.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	No	
Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	Satisfied	
Optional/General comments	Need to correct some minor grammatical mistakes	

Review Form 3

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
