

Editor's Comment:

1. The headings like "SEVERITY OF CHALLENGES" have to be removed from main headings and to be placed only as subheadings. The only main headings that have to be added, if missing, are: 1.Introduction, 2.Literature Review, 3.Methodology and Analysis, 4. Results and Discussion, 5.Conclusions.
2. All values taken in equation RBQ, have to be given at the end of section: DATA ANALYSIS. f_i , N_i , n
3. What are the min-max values taken of RBQ? Please clarify.
4. The legend of Figure 1 to be placed at the bottom of its graph, not on the top.
5. In Figure 1 the x- and y- axes have to also include relevant legend/captions. Please add them.
6. The "Ranks" of each one of Tables 1,2,3,4, have to be placed in Arabic numbers: 1,2,3,....., no in Latin: I, II, III,..... Please check and change them, where applicable.
7. Each one of the four issues: Financial, Legal, Management, and Marketing, have to be reorganized into separate subsections in the main Results and Discussion section. Besides, the 5th issue of "Social" has to be also developed and added in a separate subsection of main section Results and Discussion. At the Discussion part of the analysis authors missed to provide a "synthesis/integrated" subsection in which these 5 issues, above, to be critically discussed of how, to what extent, are interrelated? 2-3 and cross-cited paragraphs are adequate.
8. In the Conclusions section authors are recommended to stress out what constraints, limitations, implications and future prospects are offered beyond the examined "Coimbatore, Tamil Nadu, India", towards other similar geographical areas of India?, or other fast developing economies globally?
