Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> Is the manuscript important for scientific community? (Please write few sentences on this manuscript) Is the title of the article suitable? (If not please suggest an alternative title) Is the abstract of the article comprehensive? Are subsections and structure of the manuscript appropriate? Do you think the manuscript is scientifically correct? Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p><input type="checkbox"/> Introduction Enhancement: The introduction could provide more context on the global burden of HBV and its specific impact on healthcare workers. Including more recent statistics and studies would strengthen the rationale for the study.</p> <p><input type="checkbox"/> Detailed Methodology: A more detailed explanation of the questionnaire development and validation process would enhance the reproducibility of the study.</p> <p><input type="checkbox"/> Results Clarity: The presentation of results could benefit from more detailed statistical analysis, such as confidence intervals for key findings. Including more graphs and tables to visually represent the data would aid in comprehension.</p> <p><input type="checkbox"/> Discussion Depth: The discussion could delve deeper into comparing the study's findings with those from other regions or countries. Highlighting successful interventions from other settings could provide actionable insights for improving HBV awareness and vaccination rates in the studied population.</p> <p><input type="checkbox"/> Limitations and Future Research: A more explicit discussion of the study's limitations and suggestions for future research would provide a balanced perspective and guide subsequent studies.</p> <p>References:</p> <p>The references are generally sufficient and recent, but additional recent studies on HBV awareness and vaccination rates among healthcare workers from similar regions or global perspectives could strengthen the literature review. Including studies that specifically address interventions to improve HBV vaccination rates in healthcare settings would also be beneficial.</p> <p>By addressing these points, the manuscript would be strengthened, making it a more valuable contribution to the scientific community.</p>	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> Is language/English quality of the article suitable for scholarly communications? 	<p>Require revision</p>	
<p>Optional/General comments</p>
