Peer review Comments Approval Policy: <https://r1.reviewerhub.org/peer-review-comments-approval-policy/>

Benefits for Reviewers: <https://r1.reviewerhub.org/benefits-for-reviewers>

### Review Form 3

#### PART 1: Review Comments

<u>Compulsory</u> REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The review article is very important and interesting for the scientific community since crop landrace diversity and its conservation is little researched and a gap in research yet. Thus, this manuscript is very interesting due to the fact that it highlights the gap for future research in the area. Without crop landraces diversity, future crop improvement via research and breeding is impossible. So it is mandatory to talk, research and review about crop diversity (landraces) erosion and conservation for the scientific community since crop diversity is the building block for every improved varieties yet to come.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title of the review article manuscript is suitable	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract of the article is comprehensive except methods followed for reviewing is missed. Thus, the methods/methodologies used to review the article should be included on it briefly in short and precise manner.	
Are subsections and structure of the manuscript appropriate?	Sections and subsections of the article structure are appropriate but the methods/methodologies followed to write the review article is not included.  <b>The methods/methodologies followed to write the review article is should be included in separate section next to the literature review section</b>	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The manuscript is sound and scientifically robust since it followed all the scientific paper writing styles.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. :	The references are sufficient but not recent particularly in the introduction section. So, all those all older references should be replaced by recent references.  <b>Padulosi, 2012, Altieri et al., 1987, Zeven, 1998, Altieri and Merrick, 1987; Brush, 1995, Das and Das, 2004; Hore, 2005, Vijayalakshmi and Arumugasamy, 2004, Palniet al., 1998 etc. should be replaced by recent references with a maximum of five years gap</b>	
<u>Minor</u> REVISION comments  Is the language/English quality of the article suitable for scholarly communications?	The language quality of the article is suitable for the scientific communications.	
<u>Optional/General</u> comments	The article is very interesting and hot issue in the current agriculture locally and globally. Thus it is very topical to research and review about crop landraces diversity erosion and conservation currently and future times yet to come.
