Type of the Article	Review article

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Is the manuscript important for scientific community? <i>(Please write few sentences regarding this manuscript to justify your answer)</i>	Yes the topic has many potential for the future. But the methodology of the manuscript is not the best for demonstrating the subject	
Is the title of the article suitable? (If not please suggest an alternative title)	No. I think current status is more descriptive of this paper than current trends	
Is the abstract of the article comprehensive?	It is ok	
Are subsections and structure of the manuscript appropriate?	yes	
Do you think the manuscript is scientifically correct? <i>(Please write few sentences regarding this manuscript to justify your answer)</i>	Yes correct but somehow deficient	
Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.	Yes but only have 1 ref. 2023 and 2 ref 2022.	
Minor REVISION comments		
Is language/English quality of the article suitable for scholarly communications?	Yes suitable	
Optional/General comments	It should have focused more in the indications in a more clear way and the different techniques for preparation of IVM either the original IVM or that in rescue cycles	

Review Form 1.8
