

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Asian Journal of Economics, Business and Accounting
Manuscript Number:	Ms_AJEBA_125147
Title of the Manuscript:	DETERMINANTS OF CLOUD COMPUTING ADOPTION AMONGST SMES IN THE UK TECHNOLOGY SECTOR.
Type of the Article	Research Study and Statistical Analysis on Technology Adoption among SMEs

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Apart from the changes in the References, all other review comments were grossly ignored. Several comments highlighted that the survey sample size of 105 is inadequate. How can the TOE model alone be sufficient for evaluating CC adoption among SMEs? If you cannot incorporate the other mentioned points, then at least include detailed points about the drawbacks of the TOE model and suggest how future work should be approached.	Draw backs of TOE model is incorporated and suggestions are made on how future works should be made.
