Manuscript Number:	Ms_AJRAF_126098
Title of the Manuscript:	Soil loss estimation and community awareness assessment on integrated watershed management: the case of Lake Hashenge watershed, Tigray, Ethiopia
Type of the Article	Original Research Article

**Review Form 3**

**PART 1: Review Comments**

<b><u>Compulsory</u></b> REVISION comments	<b>Reviewer's comment</b>	<b>Author's Feedback</b> <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<p><b>Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.</b></p>	<p>The study of soil loss estimation and community awareness in the Lake Hashenge watershed, Tigray, Ethiopia, is essential due to severe soil degradation impacting agricultural productivity, water quality, and biodiversity in the area. By quantifying soil loss and assessing community understanding of integrated watershed management, the research aims to identify sustainable solutions for soil conservation and water management. Engaging local communities can enhance long-term watershed sustainability, reduce erosion, and improve livelihoods, making the study valuable for both ecological and socio-economic resilience</p>	
<p><b>Is the title of the article suitable? (If not please suggest an alternative title)</b></p>	<p>The present title chosen is suitable and represents the work presented</p>	
<p><b>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</b></p>	<p>The abstract is well-written in a comprehensive form, He should include alternate keywords like Soil loss equation and soil degradation</p>	
<p><b>Are subsections and structure of the manuscript appropriate?</b></p>	<p>Yes, the author has incorporated all the subsections required but it needs to be arranged properly with continuation with numbering</p>	
<p><b>Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.</b></p>	<p>The author has conducted a questionnaire survey but did not included in article it needs to be included in methodology. Tables need to be scientifically written and follow uniform format, graphs and images should be high quality and it can read easily Result and discussion written comprehensively with support of scientific literatures Author not mentioned clearly about community awareness on integrated watershed management</p>	
<p><b>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</b></p>	<p>I would like suggest to incorporate the latest references</p>	
<p><b><u>Minor</u> REVISION comments</b></p> <p><b>Is the language/English quality of the article suitable for scholarly communications?</b></p>	<p>The article is well-written in English and it is suitable for scholarly communication; however, the author needs to address the grammatical and typographical errors as indicated in the corrected copy.</p>	
<p><b><u>Optional/General</u> comments</b></p>	<p>In light of the above suggestion made by me, I consider that the manuscript can be corrected as per the suggestions and improve still better</p>	

**Review Form 3**

**PART 2:**

	<b>Reviewer's comment</b>	<b>Author's comment</b> <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
