

Review Form 3

Journal Name:	Asian Journal of Probability and Statistics
Manuscript Number:	Ms_AJPAS_126704
Title of the Manuscript:	MODELING THE RISK FACTORS OF MISCARRIAGE USING CENSORED QUANTILE REGRESSION
Type of the Article	

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.</p>	<p>Despite the knowledge that many pregnancies end in miscarriage in the early stages of pregnancy, physicians currently lack the necessary tools to identify risk factors. Therefore, the purpose of this research paper is to identify risk factors for miscarriage in the initial stage in women.</p>	
<p>Is the title of the article suitable? (If not please suggest an alternative title)</p>	<p>The title of the research paper is quiet normal. Suggested New title: <i>Risk Factors in Miscarriage : A Study of Pregnant Women in Western Kenya</i></p>	
<p>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</p>	<p>The writing structure of the abstract is quiet fascinating.</p>	
<p>Are subsections and structure of the manuscript appropriate?</p>	<p>Yes the structure and subsections of the manuscript is quite appropriate. It would have been better if the authors would have made a separate section on the Review of Literature and the factors leading to miscarriage.</p>	
<p>Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.</p>	<p>It is hypothesized that human miscarriage is not a singular event but rather the consequence of intricate interdependencies between demographic, anamnestic, physiological, and psychological risk factors, taking into account the findings of the current study as well as data currently available from basic science and epidemiology. Low BMI, low serum progesterone, and aging all shown independent impacts that are readily apparent during a routine office visit. These observations will assist medical professionals in determining which expectant mothers need closer observation or therapeutic measures, like progestogen supplements, in the early stages of pregnancy.</p>	
<p>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</p>	<p>Few more reference needs to be cited. A minimum of 30 references needs to be cited in the research paper. Few references don't have volume and page number. Do verify.</p>	
<p><u>Minor</u> REVISION comments</p> <p>Is the language/English quality of the article suitable for scholarly communications?</p>	<p>Yes, quiet relevant for scholarly communications.</p>	
<p><u>Optional/General</u> comments</p>	<p>Note: Review of literature on the factors contributing to miscarriage needs to be written briefly.</p>
