

Review Form 3

Journal Name:	International Journal of Environment and Climate Change
Manuscript Number:	Ms_IJECC_126026
Title of the Manuscript:	Biomass, carbon stock and economic value of carbon sequestration resulting from forest and land restoration actions in semi-arid ecosystems of Burkina Faso
Type of the Article	Original Research Article

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This manuscript offers valuable insights into the environmental value of land restoration. This manuscript is significant for the scientific community as it explores the relationship between forest restoration, carbon stock enhancement, and the economic value of carbon sequestration—a critical area for climate change mitigation and environmental sustainability. By quantifying biomass and carbon stocks, the study provides essential data that can guide policymakers and conservationists in optimizing land restoration efforts and valuing ecosystem services.	
Is the title of the article suitable? (If not please suggest an alternative title)	suitable	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	No need to change	
Are subsections and structure of the manuscript appropriate?	No need to change	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The research presented in this manuscript bridges ecological outcomes with economic incentives, emphasizing the dual benefits of restoration for both carbon markets and biodiversity. This work is timely and relevant, as it addresses global climate targets and the economic mechanisms that can support environmental conservation.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	References are sufficient (recent references are included).	
Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	The conclusion is general type. Need to be revised. Some pictures of sampling may create good impact.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<u>(If yes, Kindly please write down the ethical issues here in details)</u>
