

Review Form 3

Journal Name:	International Journal of Plant & Soil Science
Manuscript Number:	Ms_IJPSS_126569
Title of the Manuscript:	EFFECT OF ZERO TILLAGE PRACTICES ON GROWTH AND YIELD OF POTATO
Type of the Article	Original

Review Form 3

PART 1: Review Comments

<u>Compulsory</u> REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	Climate change is a problem for agriculture in our century, so it is important to take steps to adapt to future climate challenges, being part of sustainable agriculture, minimal farming systems are increasingly used worldwide. Potato cultivation techniques in different methods that do not involve intensive soil processing are techniques to protect the environment. The obtained results, properly presented from a statistical point of view, indicate the adaptability of the potato crop to these systems.	
Is the title of the article suitable? (If not please suggest an alternative title)	I recommend improving the title as it does not represent the results correctly. "THE EFFECT OF ALTERNATIVE TILLAGE PRACTICES ON POTATO GROWTH AND YIELD" I believe it is more appropriate.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The summary can be improved. The description of the experimental variants is too detailed and the current abstract does not show the values obtained.	
Are subsections and structure of the manuscript appropriate?	Yes, they are made properly.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	A scientific paper must contain a statistical processing method appropriate to the respective field, and the data obtained must be correctly processed and statistically interpreted. The properly performed statistical processing presents some important information for researchers and farmers in the field. The determinations made by the author are those of interest for a culture (vegetative development, production). The writing of the manuscript is adequate, which means that the author has knowledge about writing a manuscript.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Although the number of bibliographic titles corresponds to the volume of the manuscript, it can be improved.	
<u>Minor</u> REVISION comments Is the language/English quality of the article suitable for scholarly communications?	I am NOT qualified to assess the English language.	
<u>Optional/General</u> comments
