

**Review Form 3**

Journal Name:	<a href="#">Journal of Scientific Research and Reports</a>
Manuscript Number:	Ms_JSRR_125520
Title of the Manuscript:	Preliminary analysis of the feeding habits of two species of the genera Mobula (Mobula japanica and Mobula tarapacana) in the coastal waters of Côte d'Ivoire, Gulf of Guinea
Type of the Article	

**PART 1: Review Comments**

<b>Compulsory</b> REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The study of food and feeding in ray fish is essential for ensuring their health, supporting sustainable aquaculture practices, and informing conservation efforts. Understanding their dietary needs and feeding behaviors can lead to better management strategies that benefit both the species and their ecosystems.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Discuss the significance of research in the abstract.	
Are subsections and structure of the manuscript appropriate?	Authors may incorporate further statistical analyses and figures to better illustrate the results. Please, Add Photo for fish species in materials and methods.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The preliminary analysis of the feeding habits of Mobula japanica and Mobula tarapacana in the coastal waters of Côte d'Ivoire provides valuable insights into the ecological roles of these species within the Gulf of Guinea. The study employed robust methodologies for data collection, such as stomach content analysis, to accurately assess dietary preferences. Additionally, incorporating statistical methods to analyze feeding behavior and habitat utilization will enhance the validity of the findings. Overall, this research can contribute significantly to our understanding of mobulid ecology and inform conservation efforts in this region	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. :	There are very old references, and there are no citations from recent years.	

### Review Form 3

Minor REVISION comments <b>Is the language/English quality of the article suitable for scholarly communications?</b>	There are some mistakes in English language.	
<u>Optional/General</u> comments		

### **PART 2:**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
