PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The author could use scientifically tested instruments for assessment of service quality to ensure the construct validity of the research. Here, it is difficult whether the paper is a simple subjective reflection of the author or whether it shows opinions of service users on their expectation and satisfaction.	
Is the title of the article suitable? (If not please suggest an alternative title)	'Health care models' imply that the author is going to introduce different types of models. But here, I did not see such alternative models.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Abstract is good, however, some redundant words should be removed to reduce the abstract.	
Are subsections and structure of the manuscript appropriate?	Appropriate, but needs edition	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The scientific validity of the research is not clear, therefore, I recommend author to indicate at least the number of research participants, the sampling method applied and the ethical issues.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Yes	
Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	The article needs language edition.
