PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The author describes personal experiences in the this hospital I was looking for comparators, retrospective data that constitute the basis for instituting improvement . There are no accompanying tables or statistics to corroborate the statements .	
Is the title of the article suitable? (If not please suggest an alternative title)	The titie is vage. I would suggest "The HOSPITAL Sultan Iskandar Young Regency Nagan Raya Health Care Model "	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract lacks data to give insight into what the study is all about. I suggest to descrtibe the hospital, bed capacity, manpower complement, clientele base, budget, range of services, healthcare network at the very least.	
Are subsections and structure of the manuscript appropriate?	There are no results . I was looking for surveys and other evaluation tools (statistics, nurse to patient, doctor to patient ratios) to give a background on the dimensions	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	There are no available data to support the discussion. The discussion is rather rambling with long unrelated phrases . I would suggest that there be data included to describe the healthcare model.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The annual reports of the hospital, operative data, clinic offerings , rangeof services offered are important in the background.	
Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	I would suggest review for clarity and suitability for academic /scientific writing.	
Optional/General comments
