

Review Form 3

Journal Name:	Journal of Advances in Biology & Biotechnology
Manuscript Number:	Ms_JABB_125962
Title of the Manuscript:	Effect of Organic Nutrient Sources on Soil Nutrients Level in Pea (<i>Pisum sativum</i> L.)
Type of the Article	

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.</p>	<p>The manuscript on the "Effect of Organic Nutrient Sources on Soil Nutrients in Pea" is important for promoting sustainable agriculture. It offers insights into how organic inputs improve soil health, nutrient levels, and crop productivity, supporting the shift from synthetic fertilizers to eco-friendly farming practices.</p> <p>SEE ATTACHMENT</p>	
<p>Is the title of the article suitable? (If not please suggest an alternative title)</p>	<p>yes</p>	
<p>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</p>	<p>Abstract, introduction, and materials and methods perfectly written but having some mistakes in result only, having some mistakes in Tables I have mention there.</p>	
<p>Are subsections and structure of the manuscript appropriate?</p>	<p>Yes</p>	
<p>Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.</p>	<p>This manuscript is scientifically robust and technically sound because it is based on well-defined experimental protocols, including the appropriate selection of organic nutrient sources, proper soil sampling techniques, and accurate measurement of nutrient levels. The study follows a systematic approach to assess the impact of organic amendments on soil and crop health. Furthermore, the use of statistical analysis ensures reliable interpretation of the data, enhancing the credibility of the findings. The research methodology is aligned with established scientific principles, making the conclusions both valid and relevant to the field of sustainable agriculture.</p>	
<p>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</p>	<p>Minor mistake</p>	
<p>Minor REVISION comments</p> <p>Is the language/English quality of the article suitable for scholarly communications?</p>	<p>yes</p>	
<p>Optional/General comments</p>		

Review Form 3

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
