

Review Form 3

Journal Name:	Journal of Advances in Medicine and Medical Research
Manuscript Number:	Ms_JAMMR_125678
Title of the Manuscript:	Evaluating the Effectiveness and Coverage of Vaccination Programs in Reducing the Incidence of Pediatric Infectious Diseases
Type of the Article	Review

PART 1: Review Comments

<u>Compulsory</u> REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This manuscript provides a valuable contribution to the scientific community, advancing our understanding of vaccination program effectiveness and informing data-driven decisions to protect vulnerable populations.	
Is the title of the article suitable? (If not please suggest an alternative title)	It provides essential context for readers.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract is longer than recommended. It should be between 0 and 200 words.	
Are subsections and structure of the manuscript appropriate?	This manuscript holds promise, but refinements are essential to elevate its scientific impact. Addressing these structural and organizational concerns will enhance the readability, clarity, and overall quality of the research presentation.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The manuscript showcases scientific rigor and technical soundness with a thorough literature review and in-depth analysis of vaccine effectiveness. Supported by credible sources and empirical evidence, the findings are carefully acknowledged for potential limitations. The well-documented methodology substantiates the conclusions, making a valuable contribution to pediatric infectious diseases and vaccination programs.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The manuscript's references are generally sufficient, covering key studies and publications in the field of pediatric infectious diseases and vaccination programs.	
<u>Minor</u> REVISION comments Is the language/English quality of the article suitable for scholarly communications?	This manuscript exhibits promise but necessitates revisions to enhance organizational clarity, language precision, and currency of references to align with standards of scholarly communication.	
<u>Optional/General</u> comments	This manuscript presents a comprehensive review of vaccination programs and pediatric infectious diseases but requires refinement in structure, organization, language, and updated references to enhance clarity and scholarly impact, warranting revision and resubmission.
