Manuscript Number:	Ms_JOCAMR_126657
Title of the Manuscript:	<b>Histopathological and Anti-hemorrhoid Effect of the Leaf Extract of Ocimum gratissimum in Croton oil-Induced Hemorrhoid</b>
Type of the Article	<b>Research</b>

## Review Form 3

### PART 1: Review Comments

<b>Compulsory</b> REVISION comments	<b>Reviewer's comment</b>	<b>Author's Feedback</b> (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.</b>	For the treatment of Hemorrhoid this manuscript is suitable for the community. I like this manuscript because the involvement of animal studies in this research. The technique used in this manuscript is less invasive.	
<b>Is the title of the article suitable? (If not please suggest an alternative title)</b>	No, the title should contain which extract is used for the study.	
<b>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</b>	No, Methodology of the abstract should contain the extract of treatments. Result should be written in more scientific way.	
<b>Are subsections and structure of the manuscript appropriate?</b>	<b>Yes</b>	
<b>Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.</b>	There is a gap in between <i>Ocimum and gratissimum</i> instead of <i>Ocimumgratissimum</i> . How can be the activity performed if there is no reported literature survey available in database. What is the base of the activity? Hydro alcoholic extract should be mention in abstract part also. The dose of 100 and 400mg/kg used in this study without performing any acute toxicity test. What is the base of taking two doses of the plant. In experimental design part plant name is wrong. What is the route of drug administration for the treatment. In this study the plant treated group showed a significance result than the standard group, how it is possible.	
<b>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</b>	Make it arranged according to standard vancouver style format.	
<b>Minor</b> REVISION comments		
<b>Is the language/English quality of the article suitable for scholarly communications?</b>	Grammatical errors are there. Plant name should be corrected in whole manuscript. References need to be arranged in standard format according to journal policy.	
<b>Optional/General</b> comments	Without toxicity study and proper literature review the manuscript is baseless. In manuscript plant extracts showed significance result than the reference standard.
