

Review Form 3

Journal Name:	Journal of Scientific Research and Reports
Manuscript Number:	Ms_JSRR_126762
Title of the Manuscript:	Optimising growth and development by integrating water management practices and nano- fertilizers application in rice (Oryza Sativa L.)
Type of the Article	

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The present research work is vey nice and have a very good massages among scientific community. I hope this will be future for the adopting in agriculture system.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	It looks good	
Are subsections and structure of the manuscript appropriate?	Yes	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	Discussion section need to strengthen, in some section there is lack of proper discussion with reference like 2.2.1. Tiller mortality (%) 2.2.2. Dry matter accumulation (g hill ⁻¹) 2.2.3. Plant Height (cm)	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. =	Reference format is not uniform	

Review Form 3

Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	2.2.4. Number of tillers (m⁻²) It indicating the positive impact of nano-fertilizers on nutrient absorption and tiller development [24]. 2.2.5. Plant Height (cm) The increase in plant height is attributed to rapid mineralization from nano-fertilizers, enhancing nutrient availability and promoting cell elongation and division [22, 23].	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
