Journal Name:	Asian Journal of Research in Medical and Pharmaceutical Sciences
Manuscript Number:	Ms_AJRIMPS_126690
Title of the Manuscript:	CHANGES IN ENZYMATIC ANTIOXIDANTS AND RED CELL INDICES WITH MODES OF CHILD DELIVERY AMONGST WOMEN OF REPRODUCTIVE AGE IN OWERRI, IMO STATE, NIGERIA
Type of the Article	Research article

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This study provides valuable insights into the impact of different childbirth methods on maternal health, specifically oxidative stress and red cell indices, which can inform better healthcare practices. Its regional focus on women in Owerri, Nigeria, adds relevant data to global maternal health discussions.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title is informative but could be more concise. A suggested revision: "Enzymatic Antioxidants and Red Cell Indices in Relation to Modes of Child Delivery Among Women in Owerri, Imo State, Nigeria."	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract is a good summary but could benefit from more detail on the methodology and key findings. Clarifying the significance of the results would enhance its impact.	
Are subsections and structure of the manuscript appropriate?	The structure is generally appropriate, but the results section could be more clearly subdivided. Including a discussion of limitations would strengthen the manuscript.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The study design and methodology are sound, and the findings are scientifically robust. The research contributes valuable data on oxidative stress and maternal health.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The references are sufficient, but adding more recent studies on childbirth and oxidative stress would improve context and depth.	
Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	Address minor grammatical issues and improve the clarity of technical terms for broader accessibility. The language quality is generally good, but minor errors should be corrected for better readability.	
Optional/General comments	The manuscript addresses a timely topic with potential to make a significant contribution. Revisions could further enhance its clarity and impact.
