

Review Form 3

Journal Name:	Journal of Engineering Research and Reports
Manuscript Number:	Ms_JERR_121791
Title of the Manuscript:	Investigation of Noise Pollution from Different Petrol Generators in Nigeria
Type of the Article	Original Research Article

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.		
Is the title of the article suitable? (If not please suggest an alternative title)		
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.		
Are subsections and structure of the manuscript appropriate?		
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.		
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. -		

Review Form 3

<p>Minor REVISION comments</p> <p>Is the language/English quality of the article suitable for scholarly communications?</p>		
<p><u>Optional/General</u> comments</p>	<p>Comments for the Author:</p> <ol style="list-style-type: none">1. Add some literature relating to available solution techniques for the noise reduction method.2. In the Materials and Methods section: make some subsections related to this section and explain the details such as Sound producing machines, Sound measuring device, Measurement of sound pressure levels etc. (Please change these subsections with section requirements) Please make it clear and consistent with the figure.3. Explain the configuration of the digital sound level meter with figures, calibration, error, etc.4. Though the author signifies the Two-way AMOVA, explain why it was used in this paper with details5. Though the experimental data are discrete, please consider the bar graph rather than the line graph in the figures.6. In Tables 1 & 2, you should mention how you find data including required formulas.7. In the passage under Table 1, the author used some signs (<,>) which should be replaced by appropriate phrases (less than, greater than).8. The author measured sound pressure level. So, please consider replacing the word “sound intensity” to “sound pressure level” in the Results and Discussion section.9. Rewrite the conclusion and address the limitations in your work and provide suggestions for further research.10. The manuscript needs English revision. There are a lot of mistakes in almost every sentence. (Especially numbers, articles, prepositions etc.).11. There is an issue in the literature review. Please consider replacing “According to [5]” to Babatunde OM et. al explained ... or after finishing the sentence use [5].12. Please rewrite the reference style format. Yu can use appropriate software in this regard such as Mendeley Reference Manager etc.
