

Review Form 3

Journal Name:	South Asian Journal of Research in Microbiology
Manuscript Number:	Ms_SAJRM_127048
Title of the Manuscript:	Treated Wastewater by some Microalgae for Irrigation
Type of the Article	Original Research Article

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The manuscript submitted for publication in reputed journal is found to be interesting as the experimental work done is related to Phycoremediation, a cost effective, eco friendly and alternate method for waste water treatment. It is need of the hour to recycle the water and further make use in agriculture for irrigation purpose. Thus the work carried out is useful to society and all other researchers in aspects of environment and ecological efficiency	
Is the title of the article suitable? (If not please suggest an alternative title)	The title of the experimental work designed is most appropriate and there is no need to change the title	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract is clear. No need to go for addition or deletion of any points	
Are subsections and structure of the manuscript appropriate?	The manuscript is presented in subsections----Introduction, Materials and methods, Results and Discussion, Conclusion and references. It is found that the manuscript is well organized	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The manuscript is suitable for publication as the conclusions drawn are in accordance to the objectives and the findings obtained are in coincidence to the earlier researchers. The data obtained is incorporated with the help of tables and figures. The findings revealed that sewage wastewater had a decline in the physicochemical parameters assessed like pH, TDS, Nitrated, B.O.D and C.O DTwo strains of micro-algae employed were efficient in treatment of effluent and the same water would be used in agriculture for irrigation purpose for growth of ornamental plants	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The references are upto date and literature cited is more than enough to draft the experimental work analyzed	

Review Form 3

Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	The standard of English is good and quality of presentation style is appreciable	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
