

Review Form 3

Journal Name:	South Asian Journal of Research in Microbiology
Manuscript Number:	Ms_SAJRM_127055
Title of the Manuscript:	IN VITRO EVALUATION OF ANTIFUNGAL ACTIVITIES OF <i>Zingiber officinale</i> (GINGER) AND <i>Allium sativum</i> (GARLIC) EXTRACTS ON FUNGAL ISOLATES FROM TINEA CAPITIS
Type of the Article	Original Research Article

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The manuscript is important as it will help to know the antifungal activities of methanolic extracts of ginger (<i>Zingiber officinale</i>) and garlic (<i>Allium sativum</i>) on fungal isolates from Tinea capitis	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes, its suitable	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	yes	
Are subsections and structure of the manuscript appropriate?	yes	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	As the prolonged use of conventional antifungal drugs in treating infections has been associated with different issues such as antimicrobial (including antifungal) drug resistance, low efficacy and negative side effects. These issues therefore promoted this research into discovering natural medicines/herbs or plants with the potency to treat these infections. The article is robust as the isolation of fungi from Tinea capitis samples, extraction of bioactive compounds from both plants and determination of antifungal activities of the extracts, MIC and MFC on the fungal isolates will clarify their bioactives role as antifungal agent.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Some more recent reference of last 3 years should be incorporated	
Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	Its ok	
Optional/General comments		

Review Form 3

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
