### Review Form 3

#### PART 1: Review Comments

<b>Compulsory</b> REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The Study is very descriptive and all the aspects of an article have been properly and very well compiled. This manuscript will help the anthropologists and forensic experts for identification of Igbo race people from various parts of Human bodies during calamities. The exclusion and inclusion criteria have been very well mentioned. Results are almost accurate and are statistically significant and also they are congruent with pervious workers.	
Is the title of the article suitable? (If not please suggest an alternative title)	YES its suitable	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Names of anthropometric instruments used for various measurements could be mentioned in methods. Too many key words.	
Are subsections and structure of the manuscript appropriate?	YES	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	Through review of literature has been made and the materials and methods required for the study have been very well designed. Proper work on calculation of sample size has been made. The inclusion and exclusion criteria have been clearly defined. The results are statistically significant and in congruence with previous workers. The reasons for sexual differences have been clearly mentioned and also the need for the study has also been clearly discussed.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. -	Yes there is mix of recent and old references, but majority are recent	
<b>Minor</b> REVISION comments  Is the language/English quality of the article suitable for scholarly communications?	There are some spelling mistakes and at many places spaces are not given, also in results font are not same, kindly look into. Abbreviations at once are used from results and no where there full forms are mentioned.	
<b>Optional/General</b> comments	Its a good study and properly compiled. Bibiliography needs to be looked into as some references are not quoted in vancouver	

#### PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
