

Review Form 3

Journal Name:	International Journal of Research and Reports in Hematology
Manuscript Number:	Ms_IJR2H_127076
Title of the Manuscript:	Determination of knowledge level, Prevalence of Distributive Frequency and numerical ratio of Secretion and Non-secretion status of ABH Antigenic Substances using Saliva, Plasma and Urine Samples among Apparently Healthy Individuals in Bamenda II Municipality, Northwest Region, Cameroon.
Type of the Article	Original Research Article

General guidelines for the Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guidelines for the Peer Review process, reviewers are requested to visit this link:

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This scientific study will be very helpful for the researchers who want to explore ABO blood groups and other blood groups like Kell, Lewis, Lutheran, Duffy and Kidd. Also The ABH non-secretors have high acceptance rate of getting auto-immune disorder like multiple sclerosis and reactive arthritis etc.	
Is the title of the article suitable? (If not please suggest an alternative title)	I suggest to change title to be as follows : Prevalence Determination of ABH Secretor and non-secretor Among using Saliva, Plasma and Urine Samples among Healthy Individuals in Bamenda II Municipality, Northwest Region, Cameroon	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	I think that abstract is comprehensive from the Background,aim,methodology should be summarized and the results well written	
Are subsections and structure of the manuscript appropriate?	subsections and structure of the manuscript are appropriate but some of them need merge with other subsections as pointed in attach file	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	Frequency of ABH secretor status in the world population is about 80% secretors and 20% non-secretors with some geographic and racial differences. ABO blood groups and secretors status has some relevance to certain diseases and clinical and forensic medicine. Malignancies like leukemias and non-Hodgkin lymphomas alter the red cells antigens and show weaker reactivity during cell grouping. In such patients saliva studies may help to confirm the patient actual blood group if the individual is a secretor. There are certain advantages of having ABH substances in saliva and other secretions. Also there are also certain diseases which show higher incidence association with non-secretors.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Yes , the references sufficient and recent	
Minor REVISION comments	The language/English quality of the article is suitable for scholarly communications	
Is the language/English quality of the article suitable for scholarly communications?		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<u>(If yes, Kindly please write down the ethical issues here in details)</u>
