Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	1. By using 20 % KGM the friability of the product is passing at the Boder case i.e. 1.0%. Requesting author to evaluate by using higher concentration of KGM and to evaluate its impact.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Yes	

Review Form 3

Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	Fine	
Optional/General comments	<ul style="list-style-type: none">➤ By using 20 % KGM the friability of the product is passing at the Boder case i.e. 1.0%. Requesting author to evaluate by using higher concentration of KGM and to evaluate its impact.➤ Binding nature is related to the Dissolution profile of the formulation, So please do the comparative dissolution profile.➤ Why Halal binder word used in the article compared to Veg Binder/ Natural binder- strong backing points required.➤ Inclusion of 20% binder will be too much and will not be able to make a cost-effective formulation. Kindly compare the cost of other binder with this.	

PART 2:
