Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The idea of examining whether poor economic policies over the years have significantly contributed to the country's increased debt burden is very profound. However, the study's methodology and approach remains unclear	
Is the title of the article suitable? (If not please suggest an alternative title)	YES	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	YES	
Are subsections and structure of the manuscript appropriate?	The structure is okay but the most of the contents are amiss and shallow	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	It's not technically robust. No theories, at least one theory should be used in the literature review since the paper is built on theoretical argument. The used mixed approach stated isn't clearly shown for instance, the results reported from the survey aren't articulated and the likert scale as claimed to used, its results are not shown	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The references are a bit recent but we expected more references since the topic of external/public debt has been more discussed recently. The literature review needed to be more than it is.	
Minor REVISION comments	Although I am an English language editor, the language is understood	
Is the language/English quality of the article suitable for scholarly communications?		
Optional/General comments	The manuscript has a great idea but extensive review if it is to be published in a credible journal
