Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The findings in the study will guide farmers regarding the exact micro-nutrients to apply to turmeric at the appropriate time, it will prevent blanket application and misuse of agro-chemicals and also enhancing profitability due to cost reduction and improved yield. I like the manuscript because it precise and easy to replicate and most of the references are recent.	
Is the title of the article suitable? (If not please suggest an alternative title)	Not suitable. My alternative is: Effect of different micronutrients on the growth of turmeric (<i>Curcuma longa</i> L.) cv. Salem	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract should also include the different time periods at which data were collected , for example at 60, 90,120 and 150 days after transplanting before stating the key results.	
Are subsections and structure of the manuscript appropriate?	The sub-sections are appropriate	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The manuscript is scientifically correct because of the design of the experiment, the use of replicate, the time of data collection as well as the tool for analysis which are in order. Data are well spelt out as reflected in the Tables.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. -	The author can search for more references especially in the introduction, empirical data with dates could be provided rather than anonymous for the production figure of Turmeric in India and the specific states mentioned in the manuscript	
Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	The English language is suitable for scholarly communication	
Optional/General comments	The author can also use Duncan Multiple Range test to facilitate readability and comprehension of the Table at a glance. Tabes 2,3, 4 and 5 to be adjusted as edited in Table 1 The author may go further in the research to work on the effect of the micronutrients on the yield and quality of turmeric	

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
