Type of the Article	Research Article

#### PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This manuscript provides critical insights into the barriers limiting the consumption of neglected and underutilized green leafy vegetables (GLVs) in the tribal regions of Garo Hills, Meghalaya. By highlighting key determinants such as availability, nutritional awareness, and taste perception, the study underscores the unique challenges faced by urban and rural populations. Its findings emphasize the need for targeted interventions to enhance access and awareness, offering a pathway to improve dietary diversity and nutritional outcomes in these communities. The research contributes valuable knowledge for policymakers and development programs aiming to address malnutrition and promote sustainable dietary practices in tribal regions.	
Is the title of the article suitable? (If not please suggest an alternative title)	The topic of the study is suitable. However, the authors need to be specific in their title, by Green Leafy Vegetables are they referring to indigenous or exotic or??	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract is well written.	
Are subsections and structure of the manuscript appropriate?	The subsection of the manuscript is well-structured and appropriate.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	This manuscript is scientifically robust and technically sound as it is grounded in comprehensive data collection and statistical analysis. It uses a well-structured methodology to compare urban and rural populations, supported by appropriate sample sizes and clearly presented findings, including tables and statistical significance testing. The study effectively highlights key differences in GLV consumption patterns, barriers, and perceptions, drawing on quantitative metrics like weighted averages, frequencies, and p-values to substantiate its conclusions. Furthermore, the integration of contextual factors, such as anaemia prevalence and potential dietary interventions, enhances the relevance and applicability of the findings, demonstrating a thoughtful approach to addressing public health concerns.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Can the authors of the manuscript try to replace old references from 2004/13/17 etc with recent ones?
