

### Review Form 3

Journal Name:	<a href="#">Asian Journal of Medicine and Health</a>
Manuscript Number:	Ms_AJMAH_126388
Title of the Manuscript:	Association of serum bilirubin and serum uric acid with glycemic Status in Type 2 diabetes mellitus
Type of the Article	Original Research Article

#### **General guidelines for the Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guidelines for the Peer Review process, reviewers are requested to visit this link:

Peer review Comments Approval Policy: <https://r1-reviewerhub.org/peer-review-comments-approval-policy/>

Benefits for Reviewers: <https://r1-reviewerhub.org/benefits-for-reviewers>

### Review Form 3

#### PART 1: Review Comments

<b>Compulsory</b> REVISION comments	<b>Reviewer's comment</b>	<b>Author's Feedback</b> (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.</b>	This manuscript addresses a significant public health issue by exploring the association between serum bilirubin and uric acid levels with glycemic status in Type 2 diabetes mellitus (T2DM) patients. The findings highlight the potential role of serum bilirubin as a protective antioxidant, while also emphasizing the adverse effects of elevated uric acid levels on glycemic control. Such insights could be crucial for developing targeted strategies to manage oxidative stress in T2DM patients, ultimately aiding in the prevention of diabetes-related complications. I appreciate this manuscript for its well-structured methodology and clear presentation of results, which provide valuable data that could inform future research and clinical practices in the management of T2DM.	
<b>Is the title of the article suitable? (If not please suggest an alternative title)</b>	<b>yes</b>	
<b>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</b>	A Concise Abstract of the article.	
<b>Are subsections and structure of the manuscript appropriate?</b>	<b>Section methodology;</b> Please specify which methods was used for the estimation of parameters. For example; Blood Glucose ; GOD -POD method and <b>section; result;</b> do not rewrite group A healthy control subjects and group b type 2 diabetic subjects, there is no need for a negative correlation figures.	
<b>Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.</b>		
<b>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</b>	<b>References is ok</b>	
<b>Minor</b> REVISION comments	The work is informative and interesting, but I would like to request some changes."	
<b>Is the language/English quality of the article suitable for scholarly communications?</b>		
<b>Optional/General</b> comments		

#### PART 2:

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
