Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	Sarcoptic mange is one of the most important economic disease in animals. It not only causes irritation to the animals but also of zoonotic importance. The successful management of sarcoptic mange in a calf is presented in the article and this will help the scientific community to treat the disease. Hence the manuscript is good.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title of the article is suitable and goes well with the content of the manuscript.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract is a compulsory part of any manuscript and it should give a complete idea of the content of the article. In my opinion, the dose of doramecin and it's schedule of administration should be mentioned in the abstract. Moreover, the font size of the word "infestation" should be similar to the font size of the content.	
Are subsections and structure of the manuscript appropriate?	Introduction- Complete and goes well with the manuscript Case History and Diagnosis- It should be little more comprehensive, Like haematological profile which is mentioned in the abstract should be included in this section and it's detailed values should be mentioned. Treatment and Discussion- The details of supportive treatment may be included in this section. Otherwise this section is complete	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The manuscript is scientifically correct, as the drug of choice for the ailment is appropriate and is given in the required dose rate and schedule. Moreover, the pictures included by the author are the evidential proof of the improvement of the ailment after the treatment.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Sufficient.	
Minor REVISION comments	Language is correct and is suitable for further communications.	
Is the language/English quality of the article suitable for scholarly communications?		
Optional/General comments	The article is good and may be published	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
