Journal Name:	Asian Journal of Medicine and Health
Manuscript Number:	Ms_AJMAH_123516
Title of the Manuscript:	Intentions, Barriers and Attitudes Towards Improving Postpartum Long-acting Reversible Contraceptive Usage in Urban Ghana
Type of the Article	Original Research Article

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	It is essential to understand the intentions of postpartum women on long-acting reversible contraceptive (LARC) of a different community such that treatment modalities can be made available for the future. However, the number of objective required for the study should be mentioned clearly.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes the title is suitable but requires a better comprehension and to include the study population in the title.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes. To include background of the study. Conclusion can be shortened based on the study objective.	
Are subsections and structure of the manuscript appropriate?	Ethical approval details of the study should be mentioned in the last part of methodology section. Consider using flow chart for methodology section. Patient consent details to be included.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The questionnaire should be validated or any standard questionnaire reference from other article should be mentioned. The intentions and attitude of the postpartum women are better assessed. Long-acting reversible contraceptive attitude on the post partum women can enable effective treatment facilities available at the hospitals.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Old reference articles >5years has been cited which need to be updated.	
Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	Almost suitable. But requires a bit more comprehension.	
Optional/General comments	NA
