

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Asian Journal of Research in Infectious Diseases
Manuscript Number:	Ms_AJRID_127298
Title of the Manuscript:	Cholera in Zambia: Examining the Multisectoral Elimination Plan, 2025
Type of Article :	Review

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>The structuring of the manuscript still needs to be reviewed with the insertion of the Material and Method section, and result and discussion although it is a journal article.</p> <p>Furthermore, the color code and specifications of many figures (pie chart) have not been improved. Considering all this, revisions are still necessary, at the risk of outright rejection.</p>	<p>We appreciate your comments.</p> <p>We overlooked the material and method section as well as result and discussion because this is a review article. However, we shall include them as per the request from the reviewer.</p> <p>Kindly note that the pie chart does not represent the blue colour coding for the comfortably supplied due to the zero-percentage representation. [The national population reported zero percent in the comfortably managed category for both water supply and sanitation services.] Thus, the software that was used to generate these figures could not depict the blue colour. We hope this is a better explanation as to why we did not "improve" figures 3a and 3b. Otherwise, we acknowledge your concern and please do let us know if there is anything we can do better with the figures.</p> <p>Thank you.</p>
