

Editor's Comment:

Thanks very much for sending the reviewed manuscript (2024/ARRB/127012) for providing a final decision. I am very glad to evaluate this interesting piece of research paper and found that the authors have done good jobs in revising their manuscript based on the majority of the scholastic comments/suggestions given by the reviewers as well as improving the manuscript in a good manner. However, there are still some ways that the words and overall languages can be improved as well as formatting/arranging of tables, figures, citations and references, which need to be corrected/revised based on the prescribed guidelines of the journal before final printing. Therefore, I recommend this paper for publication in "Annual Research & Review in Biology", pending minor revisions as suggested above.
