Title of the Manuscript:	Biological Activities and Phytochemical Constituents in the Stimulatory Potential of Tithonia diversifolia Fermented Extracts: A Review
Type of the Article	

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This manuscript is important for the scientific community as it highlights the therapeutic potential of Tithonia diversifolia fermented extracts. I appreciate its comprehensive analysis and the potential for advancing phytochemical and pharmacological research.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title of the article, "Biological Activities and Phytochemical Constituents in the Stimulatory Potential of Tithonia diversifolia Fermented Extracts: A Review," is suitable as it accurately reflects the content and focus of the manuscript. An alternative title could be: "Stimulatory Potential of Fermented Tithonia diversifolia Extracts: Biological Activities and Phytochemical Analysis."	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract of the article is comprehensive, covering the key aspects of the study. However, some points could be clarified and streamlined for better readability. Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	Yes	
Optional/General comments	<p>The manuscript is well-structured and presents a clear focus on the biological activities and phytochemical constituents of Tithonia diversifolia fermented extracts. The review of existing literature is thorough, providing a comprehensive background. The study addresses a relevant and timely issue, considering the increasing global demand for sustainable agricultural practices. The discussion on the methodologies used to assess the biological activities and phytochemical constituents of the extracts is detailed and well-explained. However, more specific information on the experimental procedures and analytical techniques used could enhance the manuscript's comprehensiveness. The data and findings are presented clearly, The conclusions drawn are supported by the evidence presented. The references are current and relevant.</p> <p>The manuscript makes a valuable contribution to the field and is suitable for publication with minor revisions to enhance clarity, readability, and comprehensiveness.</p>
