Journal Name:	Physical Science International Journal
Manuscript Number:	Ms_PSIJ_126932
Title of the Manuscript:	Exploration of the Specific Forms of Electron Spin
Type of the Article	

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	Electron spin, so far, is still a puzzle for modern physics, and it has the room to do further explore. This paper provides a new idea for us to lean what the electron spin exactly is, and it offers a new explanation for this topic	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract is good enough.	
Are subsections and structure of the manuscript appropriate?	Yes	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The math inside the paper is good and clean. The description of the new assumptions is in details. The explanation based on the assumption for the experiment is acceptable.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. -	This section is way weak, most of the references are from the Chinese authors, more references from other countries scholars should be included.	
Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	Some of the sentences need to be polished more academically. I suggest to adding a numeric calculation example.	
Optional/General comments
