

Editor's Comment:

However, in the paper a small part of Methodology is required.

In the Conclusions (at plural) part, I think that an opinion regarding the spread of this activity to other domains..

References are wrongly written. In the alphabetical order of authors' last names. And, the year of publishing, immediately after the authors' names. Thus, the first reference is Bhagat K K et al (2016).... and, the last positions are, I think only regarding how the names are written, Zhang J L et al (2012)...., Zhao Q (2024)... and Zhong XL et al (2013)..

OK for publishing
