

Review Form 3

Journal Name:	Asian Journal of Advanced Research and Reports
Manuscript Number:	Ms_AJARR_127587
Title of the Manuscript:	Arnold chiari type III and encephalocele, a rare and serious association: a case report
Type of the Article	Case report

Review Form 3

PART 1: Review Comments

<u>Compulsory</u> REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<p>Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.</p>	<p>This manuscript discusses an uncommon association between Arnold-Chiari Type III malformation and encephalocele. The manuscript's emphasis on using MRI for diagnosis and discussing multidisciplinary management strategies is particularly useful for healthcare professionals in pediatrics, neurology, and neurosurgery. The rarity of the presented association and the detailed clinical description make the work novel and relevant to its target audience.</p>	
<p>Is the title of the article suitable? (If not please suggest an alternative title)</p>	<p>Yes.</p>	
<p>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</p>	<p>Yes.</p>	
<p>Are subsections and structure of the manuscript appropriate?</p>	<p>Yes.</p>	
<p>Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.</p>	<p>While the case is unique, the manuscript does not provide sufficient comparative discussion with similar cases in the literature. Including a brief review of previously reported cases or incidence data would enhance its academic contribution. The manuscript repeatedly mentions "encephalocele" and "Arnold-Chiari Type III" but does not delve into differentiating features of this subtype compared to other Chiari malformations. Clarifying this could enhance diagnostic insights.</p>	
<p>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</p>	<p>Yes.</p>	
<p><u>Minor</u> REVISION comments</p> <p>Is the language/English quality of the article suitable for scholarly communications?</p>	<p>The manuscript's language is understandable but needs significant refinement for clarity and scientific rigor. A native speaker should revise the manuscript as the language requires substantial editing for grammar and clarity.</p>	
<p><u>Optional/General</u> comments</p>
