| Title of the Manuscript: | Uterine Torsion: A Rare Obstetric Emergency |
| Type of the Article | Case report |

Review Form 3

PART 1: Review Comments

| Compulsory REVISION comments | Reviewer's comment | Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|---|---|---|
| Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part. | This is nice topic about rare situation in pregnancy with accidental findings during surgical delivery. Mostly, the condition must be suspected if no explanation for lower abdominal persistent pain in the second or third trimester. | |
| Is the title of the article suitable? (If not please suggest an alternative title) | Yes | |
| Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here. | The researchers were unsuccessful in writing the introduction to the research, as it was written in a poor writing style and far from the common foundations of scientific research. | |
| Are subsections and structure of the manuscript appropriate? | This point in particular is not applicable because the whole case report manuscript is not written correctly. | |
| Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part. | <p>There is a weakness in documentation and a weakness in the way they are presented as pathological cases, despite their rarity</p> <p>The use of four recent references is considered a weakness of the research, and the researchers should have reviewed the literature on the subject, especially since it is rare</p> <p>I cannot understand what the authors mean by saying "Giving a trial of vaginal delivery for such patients can be disastrous" if the diagnosis is mainly in labor during cesarean delivery. In addition, I cannot understand the statement mentioned in the text "Management is detorsion followed by cesarean section and removal of any tumors" because this is not true in this shape.</p> | |
| Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. :- | <p>The number of references is very small, and here I suggest that researchers review the following publications to help rewrite the research:</p> <p>Sparić R, Pervulov M, Stefanović A, Tadić J, Gojnić M, Milićević S, Berisavac M. [Uterine torsion in term pregnancy]. Srp Arh Celok Lek. 2007 Sep-Oct;135(9-10):572-5. Serbian. doi: 10.2298/sarh0710572s. PMID: 18088045.</p> <p>Jensen JG. Uterine torsion in pregnancy. Acta Obstet Gynecol Scand. 1992 May;71(4):260-5. doi: 10.3109/00016349209021049. PMID: 1322618.</p> <p>Carbonne B, Cabrol D, Viltart JP, Papiernik E. Torsion de l'utérus gravide [Torsion of the pregnant uterus]. J Gynecol Obstet Biol Reprod (Paris). 1994;23(6):717-8. French. PMID: 7995919.</p> | |

Review Form 3

| | | |
|---|--|--|
| Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications? | No. the paper needs proper language editing. | |
| Optional/General comments | | |

PART 2:

| | | |
|---|--|--|
| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
| Are there ethical issues in this manuscript? | <i>(If yes, Kindly please write down the ethical issues here in details)</i> | |
